FROM THE DESK OF THE PROPRIETOR:

It all started as a dream……

A dream that I had before 15 years in my prime years - of starting an erection company which will give shape to my future goal of making a niche in the industry. With technical knowledge and expertise as the capital, workers' trust and hard work as the asset and the good will of the clients as the motivational force **"ABDUL BIN CONSTRUCTION "** was born in 2010. 'We can dream, create, design & build the most wonderful place in the world but it requires people to make the dream a reality," Walt Disney said. I am happy to say I was lucky to have a group of able men with me.

Looking back, it was not an even road to travel these 10 years. There were ups & downs, success and failures, accidents, financial strains and misunderstandings, but all these obstacles have become gateways leading to new beginnings. Perspiration and perseverance of the management and workmen resulted in progress. Years have taught us more than books and for the years to come, our line of action for success will be **forethought, system,planning, intelligence, honest purpose and perspiration.**

Together we have made this closely knit family of "ABC" and to this family I dedicate this company profile.

Mr. MD IBRAR

Welcome

Abdul Bin Construction is in the Erection & Commissioning Services of the complete, Boilers, Multi Fuel boilers, cement plants, etc. ABC is serving in India for the past 10+ years. The aim of ABC is to build goodwill among the customers and win the customer satisfaction by offering the timely best quality service to the clients. Our motto is to grow with the customers using Win and Win Strategy. It is our pleasure to communicate our strength and achievement through this profile.

Our lines of business

ABC are in the core business of erection and commissioning of the complete **Power Plant complete coal fired and Waste Heat Recovery Power Plants,**etc**.** In the power sector we erect **boilers** and its accessories and **turbo-generators** too.

ABC offers an integrated service in, Fabrication, Dismantling, erection, trials, testing and commissioning in addition to mechanical equipment erection and commissioning services.

.
