- POSTMAN

PROFILE

As a versatile and dynamic Full Stack Developer, With more than 3 YEARS of Experience. I bring extensive experience in both front-end and back-end development, delivering end-to-end solutions that are efficient, scale-able, and user friendly.

My expertise spans multiple programming languages and frameworks, enabling me to build robust web applications from the ground up.

WORK EXPERIENCE

• .NET POOL TECHNOLOGIES

FULL STACK DEVALOPER

- Delivered scalable full-stack web applications using React.js, Node.js, MongoDB, and MySQL for diverse client projects.
- Collaborated directly with clients to gather requirements, plan architecture, and implement solutions with a focus on performance and user experience.
- Built dynamic UIs and RESTful APIs, ensuring seamless frontend-backend integration.
- Managed deployment, bug fixes, and iterative improvements based on user feedback.
- Worked independently and met strict deadlines, contributing to successful product launches.

PROJECTS

1. MSMODEL SCHOOL

MS Model School – School Management System

LINK-<https://msmodelschool.info/> | Personal Project |

Tech Stack: HTML, CSS, PHP, MySQL

- Developed a fully dynamic and responsive website for school management using HTML, CSS, and PHP.
- Integrated MySQL as the backend database to manage student records, attendance, results, and other administrative modules.
- Implemented user authentication, role-based access (admin, teacher, student), and real-time data updates.
- Focused on creating an intuitive interface for both administrators and users to simplify day-to-day operations.

2. KOLKATA TECHNICAL INSTITUTE

KTI – Labour Training and Placement Company Website

LINK-<https://ktinstitute.in/> | Client Project | Tech Stack: HTML, CSS, JavaScript, PHP, MySQL

- Designed and developed a dynamic website for KTI, a company focused on labor training and overseas placement.
- Built the frontend using HTML, CSS, and JavaScript to ensure a responsive and user-friendly interface.
- Developed the backend with PHP and integrated a MySQL database to handle user registrations, job listings, application tracking, and admin management.
- Ensured cross-browser compatibility, optimized loading times, and implemented secure form handling and validation.

3. TENTARA

Tentara – Travel Agency Website

LINK-<https://github.com/13ri2003/teentara>

Client Project | Tech Stack: React.js, Node.js, MongoDB, Postman

- Developed a fully functional travel agency platform using React.js for the frontend and Node.js for the backend.
- Integrated MongoDB as the database to manage travel packages, user bookings, and inquiries.
- Implemented secure user authentication, dynamic routing, and responsive UI for a seamless user experience.
